Hi Dave - thanks for sending the letter. I'm not sure how this fits in with the CZARA Settlement Agreement, as I'm confused between the CNPCP and CZARA approvals. I'll try to clarify with Jayne. In the meanwhile, if you need anything from me, feel free to let me know.

Subject: Fw: CZARA and Oregon's agriculture program

Attached is a letter from NWEA that raises concerns about EPA/NOAA approval of the OR's CNPCP management measures for agriculture.

EPA and NOAA have not been able to approve the following three areas of OR's CNPCP: Management measures for new developments & OSDS and additional management measures for forestry. A few dozen other areas of the OR CNPCP have been "approved" (highways & bridges, monitoring, agriculture, marinas, etc.) and NOAA and EPA have been waiting for the State to address the three outstanding areas of the CNPCP before making a final determination on OR's CNPCP.

I haven't read NWEA's 33 page letter yet but a quick skim indicates that NWEA believes that OR's nonpoint source program for agriculture should not be approved. Although we haven't made a final determination on OR's CNPCP the only issues we've raised with the State for the past several years relate to conditions for new developments & OSDS and additional management measures for forestry. Forestry has been the primary focus of NWEA and the settlement agreement does not mention agriculture. I should note the mid-coast implementation ready TMDL will address agriculture as well as other sectors in the mid-coast basins. So will IR TMDLs for other coastal basins.

NOAA and EPA are working on a response to NWEA prior letter....should be consider using that response for the attached NWEA letter too?

p.s. I've included Karma and Rick because ag is the focus of the latest NWEA letter and we may run in to similar issues related to a final decision on WA's CNPCP.
